

CITY OF SUGAR LAND
Department of Building Safety

REQUEST FOR TEMPORARY UTILITIES

DATE: _____ **APPLICATION #:** _____

ADDRESS: _____

We, the general contractor and electrical contractor, request the use of temporary utilities for construction activities and the testing of equipment. We understand that the issuance of approval for temporary utilities in no way grants permission to occupy or use any building, or portion thereof, unless all required inspections for the building have been approved and a Certificate of Occupancy has been issued.

We further understand that temporary utilities may be disconnected for any violation of the adopted Building Code, Electrical Code, or other applicable city ordinances. The general contractor and owner assume responsibility for any violation of city ordinances or code requirements by a subcontractor.

Electrical Safety During Construction

Approval to energize electrical service during the construction phase is granted solely to support construction-related activities. All energized electrical systems, whether temporary or permanent, shall be installed, protected, and maintained in a safe condition at all times. The permit holder is responsible for ensuring that electrical installations are properly guarded, secured from damage, and do not present an electrical hazard to workers, inspectors, or the public.

Any unsafe, incomplete, or noncompliant electrical conditions observed may result in immediate revocation of temporary utility approval and/or disconnection of electrical service until such conditions are corrected and approved by the City.

The undersigned hereby agrees to indemnify and hold forever harmless the City of Sugar Land, its officers, and employees from any and all claims or causes of action alleged to have been caused directly or indirectly by the temporary use of utilities for which this application is made.
